tracked by the system. Similarly, think of any other SaaS use case that needs to expose APIs for the client apps. You can infer the primary resources used in the use case and design the APIs around that.

How to build a REST API with Node.js - Part 1 | RapidAPI

Before your application can use Google's OAuth 2.0 authentication system for user login, you must set up a project in the Google API Console to obtain OAuth 2.0 credentials, set a redirect URI, and (optionally) customize the branding information that your users see on the user-consent screen. You can also use the API Console to create a service ...
